

# Exhibit D

**The difference is Ultrasound.**

**Ultreeo** takes power brushing where it's never gone before with a groundbreaking combination of ultrasound waveguide technology and precisely tuned sonic bristle action. **Ultreeo's** bristles create bubbles that are powerfully activated by nearly 4 million cycles of ultrasound energy, channelled by a proprietary ultrasound waveguide. As these bubbles expand and contract, they are able to remove plaque bacteria. **Ultreeo**—a safe, yet powerful cleaning combination of ultrasound-activated pulsating bubbles and sonic bristle action for a gentle, deep, long-lasting feeling of clean.

**Try the new Ultreeo for the Ultimate Ultrasound Clean.**

Ultreeo's combination of ultrasound waveguide technology and sonic bristle action can remove hard-to-reach plaque bacteria that bristle action alone can leave behind.
